FEBRUARY 2020

"Knowledge is too important to leave in the hands of the bosses."

The Consumer Price Index (CPI) was 4.6% in February 2020

The term inflation means a sustained increase in the general level of prices for goods and services. It is measured as an annual percentage increase (for example, February 2019 to February 2020). Take note that a falling rate of inflation means that prices are rising at a slower rate.

The **headline inflation** rate increased to 4.6% in February 2020 from 4.5% in January 2020. On average, prices increased by 0.1% month-on-month in February 2020.

The food price increased to 4.2% in February 2020 from 3.7% in January 2020.

Transport inflation slow down to 6.2% in February 2020 from 6.4% in January 2020.

Public transport inflation increased to 0.8% in February 2020 from 0.7% in January 2020 (Buses, trains, and other forms of transport that are available to the public charge set fares and run on fixed routes.)

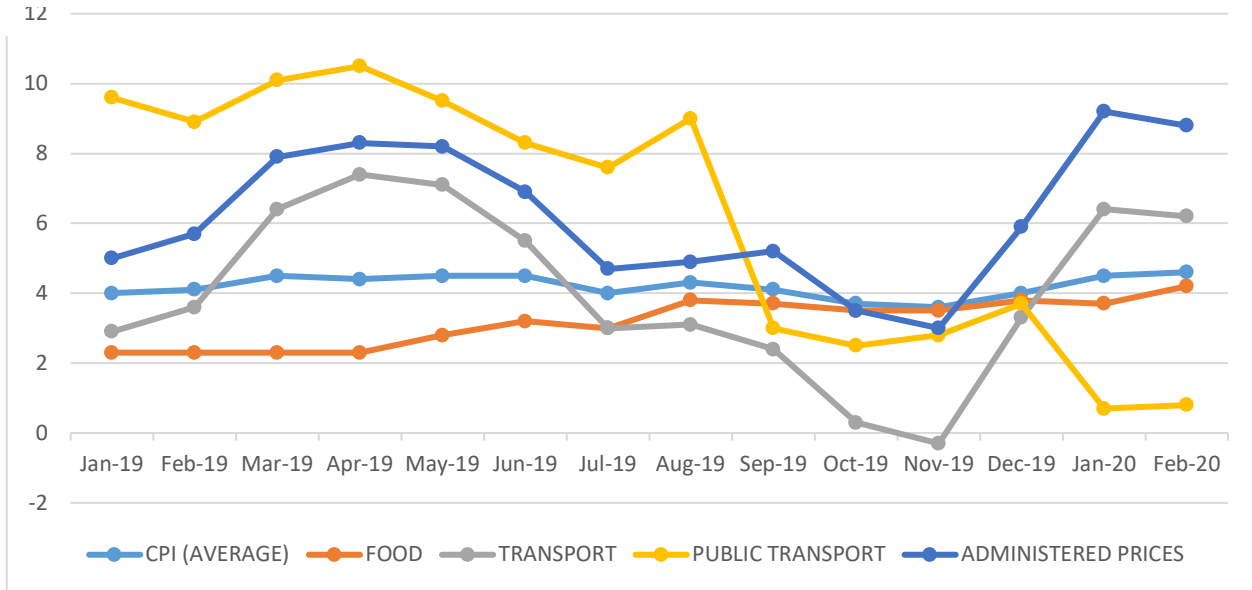

Administrator's price (school fees, telephone fees, electricity, trains, and petrol/paraffin) declined to 8.8% in February 2020 from 9.2% in January 2020.)

Statistic South Africa divides household monthly expenditure into 10 decile. The table 3 below shows that decile 10 expenditure was higher than decile 1 expenditure, indicating a high level of inequality.

Table 3: Annualised inflation by expenditure group, February 2020

	Monthly expenditure	Inflation Rate Feb-20
Average annual CPI		4.6%
Decile 1	Up to R1477 per month	5.1%

Decile 3	R2456 up to R3549 per month	4.5%
Decile 4	R3549 up to R4742 per month	4.3%
Decile 5	R4742 up to R6151 per month	4%
Decile 6	R6151 up to R7907 per month	3.8%

There is more than one inflation number. The inflation rate that is reported in mainstream media is the average inflation rate. Different groups, from the very poor to the wealthy, can experience different rates of inflation, because they buy different things.

The very low group (Decile 1) experienced an inflation rate of 5.1%, higher than headline inflation rate of 4.6%, while the very high expenditure group (Decile 10) had an inflation rate of 4.9%.

Limpopo, Northern Cape and Western Cape provinces had an annual inflation rate **higher than headline inflation**, at 4.6%, 4.7% and 5.3% respectively.

An administered price is defined as the price of a product, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly or through one or other government agencies/institution without reference to market forces. For example, school fees, telephone fees, electricity, trains, petrol/paraffin, cell calls and public transport. This rate is incorporated into the overall CPI inflation rate.

The CPI figures for March 2020 are expected on 22nd April.
