NOVEMBER 2021

The Consumer Price Index increased to 5.5% in November 2021

The term inflation means a sustained increase in the general level of prices of goods and services. It is measured as an annual percentage increase (for example, November 2020 to November 2021). A falling rate of inflation means that prices are rising at a slower rate.

The headline annual inflation rate was 5.5% in November 2021, compared with 5% in October 2021. The Consumer Price Index (CPI) increased by 0.5% month-on-month in November 2021.

The food price declined to 6% in November 2021 from 6.7% in October 2021.

Transport inflation increased to 15% in November 2021 from 10.9% in October 2021.

Public transport inflation increased 8.3% in November 2021 from 6% in November 2021. (Buses, trains and other forms of transport that are available to the public charge set fares and run on fixed routes.)

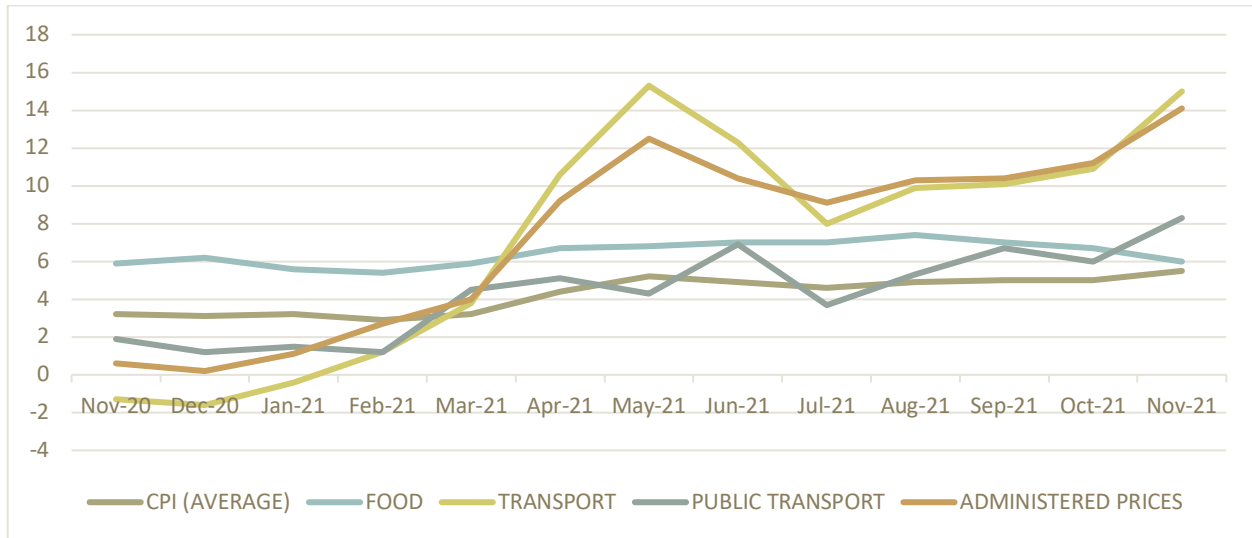

The administrator's price (school, telephone fees, electricity, trains, and petrol/paraffin) increased to 14.1% in November 2021 from 11.2% in October 2021.

Statistics South Africa divides household monthly expenditure into 10 deciles. The table below shows that the decile 10 expenditure was higher than the decile 1 expenditure, indicating a high level of inequality.

Table 3: Annualised inflation by expenditure group | November 2021

	Monthly expenditure	Inflation Rate Nov-21
Average annual CPI		5.5%
Decile 1	Up to R1477 per month	6.3%
Decile 2	R1477 up to R2456 per month	5.8%
Decile 3	R2456 up to R3549 per month	5.2%
Decile 4	R3549 up to R4742 per month	4.9%
Decile 5	R4742 up to R6151 per month	4.7%
Decile 6	R6151 up to R7907 per month	4.5%
Decile 7	R7907 up to R10352 per month	4.9%
Decile 8	R10352 up to R14419 per month	5.3%
Decile 9	R14419 up to R22492 per month	5.7%
Decile 10	R22492 and more...	5.8%

There is more than one inflation number. Different groups, from the very poor to the wealthy, can experience different rates of inflation because they buy different things.

The very low group (Decile 1) experienced an inflation rate of 6.3%, which was higher than the headline annualised inflation rate of 5.5%, while the very high expenditure group (Decile 10) had an inflation rate of 5.8%, which was 0.3% higher than the 5.5% inflation rate recorded in November 2021.

The provinces with an annual inflation rate **lower than or equal to headline inflation** were Mpumalanga (5,3%), Free State (5,3%), KwaZulu-Natal (5,4%), Gauteng (5,5%) and

Limpopo (5,5%). The provinces with an annual inflation rate higher than headline inflation were Eastern Cape (5.6%), Northern Cape (5.6%), Western Cape (5.7%) and North West (6,2%).

The Consumer Price Index is known as the headline inflation rate and is also referred to as the official inflation rate. The month to month prices of over a thousand goods and services go into the calculation of CPI.

An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly or through one or other government agencies/institution without reference to market forces. For example, school fees, telephone fees, electricity, trains, petrol/paraffin, cell calls and public transport. This rate is incorporated into the overall CPI inflation rate.

The December 2021 CPI figures are expected on 19th January 2022
