Inflation Monitor

The Consumer Price Index increased to 5.9% in March 2022

The term inflation means a sustained increase in the general level of prices of goods and services. It is measured as an annual percentage increase (for example, March 2021 to March 2022). A falling rate of inflation means that prices are rising at a slower rate.

The headline annual inflation rate increased to 5.9% in March 2022, from 5.7% in February 2022. The Consumer Price Index (CPI) increased by 1.0% month-on-month in March 2022.

The food price slowed down to 6.6% in March 2022 from 6.7% in February 2022.

Transport inflation increased to 15.7% in March 2022 from 14.3% in February 2022.

Public transport inflation increased 14% in March 2022 from 12.3% in February 2022.

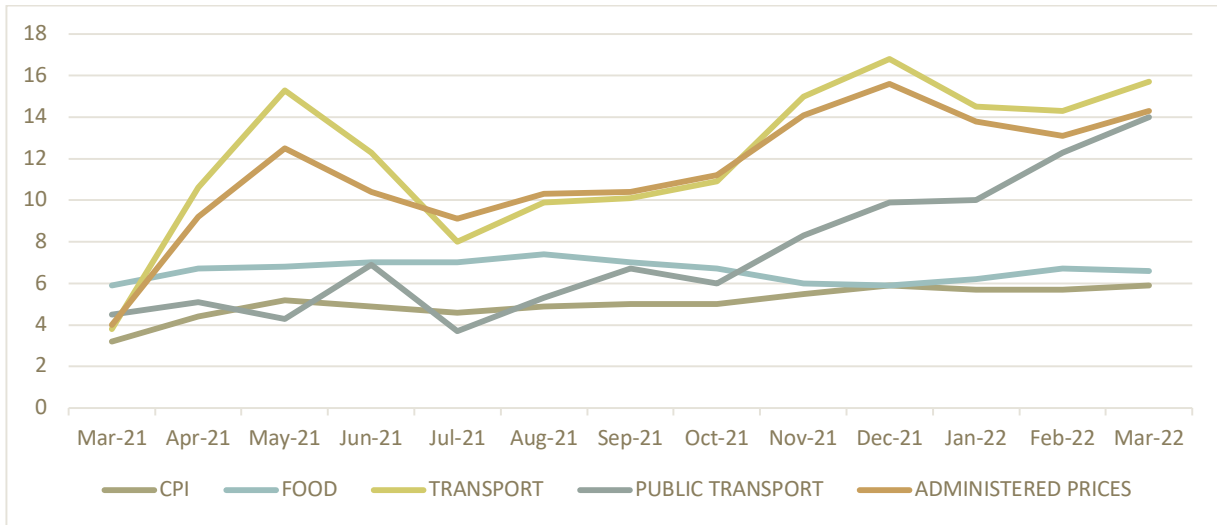

The administrator's price (school, telephone fees, electricity, trains, and petrol/paraffin) increased to 14.3% in March 2022 from 13.1% in February 2022.

Statistics South Africa divides household monthly expenditure into 10 deciles. The table below shows that the decile 10 expenditure was higher than the decile 1 expenditure, indicating a high level of inequality.

Table 3: Annualised inflation by expenditure group | March 2022

	Monthly expenditure	Inflation Rate Mar-22
Average annual CPI		5.9%
Decile 1	Up to R1477 per month	6.7%
Decile 2	R1477 up to R2456 per month	6.4%
Decile 3	R2456 up to R3549 per month	5.7%
Decile 4	R3549 up to R4742 per month	5.5%
Decile 5	R4742 up to R6151 per month	5.4%
Decile 6	R6151 up to R7907 per month	5.3%
Decile 7	R7907 up to R10352 per month	5.7%
Decile 8	R10352 up to R14419 per month	5.9%
Decile 9	R14419 up to R22492 per month	6.1%
Decile 10	R22492 and more...	6.1%

There is more than one inflation number. Different groups, from the very poor to the wealthy, can experience different rates of inflation because they buy different things.

The very low group (Decile 1) experienced an inflation rate of 6.7%, which was higher than the headline annualised inflation rate of 5.9%, while the very high expenditure group (Decile 10) had an inflation rate of 6.1%, which was 0.2% higher than the 5.9% inflation rate of March 2022.

The provinces with an annual inflation rate **lower than or equal to headline inflation** were Western Cape (5.6%), Free State (5.8%) and KwaZulu-Natal (5.9%). The provinces with an annual inflation rate **higher than headline inflation** were Gauteng (6.1%), Mpumalanga (6.1%), Eastern Cape (6.2%), Northern Cape (6.3%), North West (6.4%) and Limpopo (6.6%).

An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price, which can be determined

or influenced by government, either directly or through one or other government agencies/institution without reference to market forces. For example, school fees, telephone fees, electricity, trains, petrol/paraffin, cell calls and public transport. This rate is incorporated into the overall CPI inflation rate.

The April 2022 CPI figures are expected on 18th May 2022
