Consumer price index increased to 5.3% in January 2024

Inflation is a sustained rise in the general level of prices of goods and services. It is measured as an annual percentage increase (e.g. January 2023 to January 2024). A falling rate of inflation means that prices are rising more slowly.

The annual headline inflation rate increased to 5.3% in January 2024 from 5.1% in December 2023. The **Consumer Price Index (CPI)** increased by 0.1% month-on-month in January 2024.

Food prices declined to 7% in January 2024 from 8.5% in December 2023.

Transport inflation increased to 4.6% in January 2024 from 2.6% in December 2023.

Public transport inflation increased to 0.5% in January 2024 from 0.4% in December 2023.

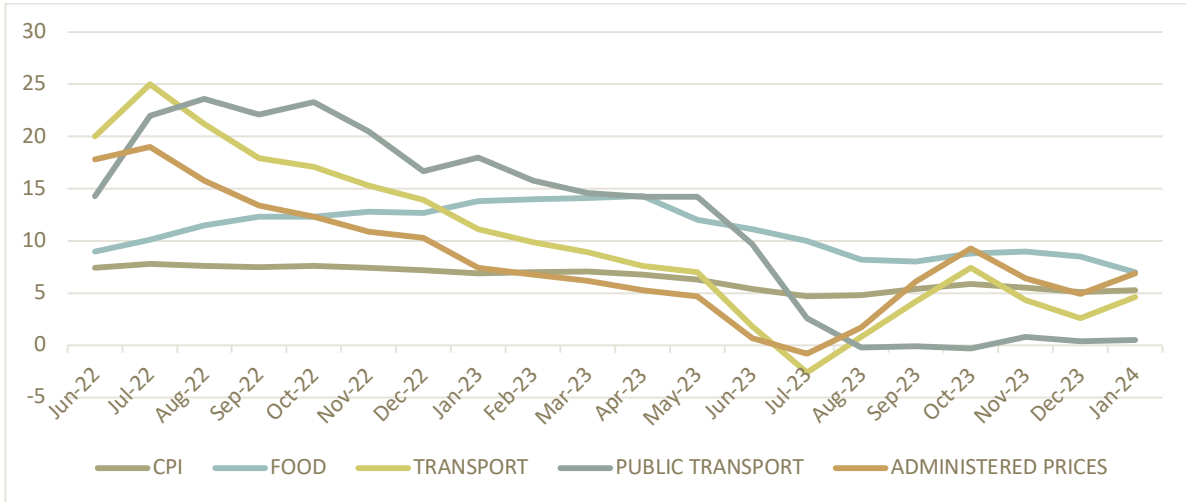

The **administrator's price** increased to 6.9% in January 2024 from 4.9% in December 2023.

Statistics South Africa divides monthly household expenditure into 10 deciles. Expenditure in decile 10 was higher than expenditure in decile 1, indicating extreme inequality.

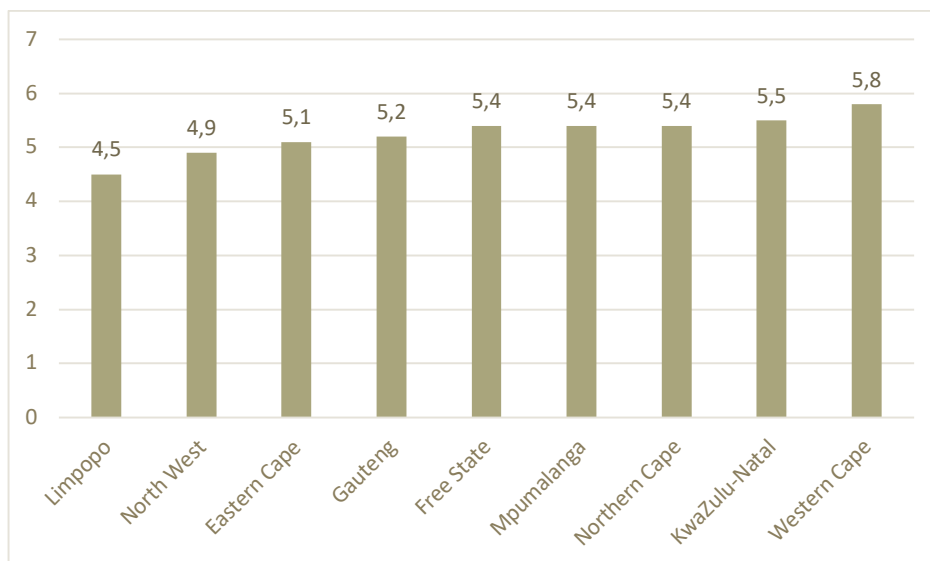

Table 2: Annualised inflation by expenditure group | January 2024

	Monthly expenditure	Inflation Rate Jan-24
Average annual CPI		5.3%
Decile 1	Up to R1 678 per month	7.6%
Decile 2	R1 678 up to R2 802 per month	7%
Decile 3	R2 802 up to R4 056 per month	6.3%
Decile 4	R4 056 up to R5 434 per month	5.7%

There is more than one inflation rate. Different groups, from the very poor to the rich, can experience different rates of inflation because they buy different things. The very low spending group (decile 1) experienced an inflation rate of 7.6%, which was higher than the headline annualised inflation rate of 5.3%, while the very high spending group (decile 10) had an inflation rate of 5.4%, which was 0.1% higher to the inflation rate of 5.3% in January 2024.

Figure 3: Annualised inflation rate (%) by province | January 2024

The provinces with annual inflation rates lower than or equal to the headline rate were Limpopo (4.5%), North West (4.9%), Eastern Cape (5.1%) and Gauteng (5.2%). Free State (5.4%), Mpumalanga (5.4%), Mpumalanga (5.4%), Northern Cape (5.4%), KwaZulu-Natal (5.5%), and Western Cape (5.8%) were the provinces with annual inflation rates higher than the headline rate.

The consumer price index is known as the headline inflation rate and is also called the official inflation rate. The monthly prices of over a thousand goods and services are used to calculate the CPI.

An administered price: The price of a product deliberately fixed by a single producer or group of producers and/or any price that may be determined or influenced by the government, either directly or through one or more government agencies/institutions, without reference to market forces. Examples include school fees, telephone charges, electricity, trains, petrol/paraffin, mobile phone calls and public transport. This rate is part of the overall CPI inflation rate.

The February 2024 CPI figures are expected on 20 March 2024
