November 2025

LRS.ORG.ZA

Consumer price index decreased to 3.5% in November 2025.

Inflation is a sustained rise in the general level of prices of goods and services. It is measured as an annual percentage increase, for example, November 2024 to November 2025). A falling rate of inflation means that prices are rising more slowly.

The annual headline inflation rate decreased to 3,5% in November 2025 from 3,6% in October 2025. The Consumer Price Index (CPI) increased by 0,1% month-on-month in November 2025.

Food prices increased to 4,4% in November 2025 from 3,9% in October 2025. Transport inflation decreased to 0,7% in November 2025 from 1,5% in October 2025. Public transport inflation decreased to -1,7% in November 2025 from -2,8% in October 2025. The administrator's price decreased to 4,9% in November 2025 from 6% in October 2025.

Statistics South Africa divides monthly household expenditure into 10 deciles. Expenditure in decile 10 was higher than expenditure in decile 1, indicating extreme inequality.

There is more than one inflation rate. Different groups, from the very poor to the rich, can experience different rates of inflation because they buy different things. The very low spending group (decile 1) experienced an inflation rate of 2,7%, which was lower than the headline Annualised inflation rate of 3,5%, while the very high spending group (decile 10) had an inflation rate of 3,9%, which was higher than the Annualised inflation rate of 3,5% in November 2025.

Eastern Cape (3,1%), Gauteng (3,2%), Mpumalanga (3,3%), Northern Cape (3,3%) and Free State (3,3%) were the provinces with annual inflation rates lower than or equal to

the headline rate. KwaZulu-Natal (3,6%), Western Cape (3,8%), North West (4%) and Limpopo (4,2%) were the provinces with annual inflation higher than headline inflation.

The consumer price index is known as the headline inflation rate and is also called the official inflation rate. The monthly prices of over a thousand goods and services are used to calculate the CPI.

The transport price index measures the increase in the price level of transport items in the basket of goods and services that make up the inflation index. It is included in overall CPI inflation.

An administered price: The price of a product deliberately fixed by a single producer or group of producers and/or any price that may be determined or influenced by the government, either directly or through one or more government agencies/institutions, without reference to market forces. Examples include school fees, telephone charges, electricity, trains, petrol/paraffin, mobile phone calls and public transport. This rate is part of the overall CPI inflation rate.

December 2025 CPI figures are expected on 21 January 2026
